About Us

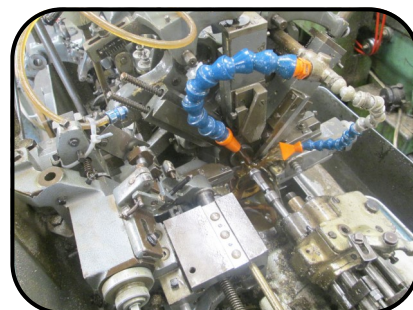

With over 25 years experience, we are the leading manufacturers of precision turned screws for the model engineer, and engineering trades, in the UK.

We are a family run company who have successfully established ourselves with a record for fantastic customer service and quality products. As a family with keen engineering interests ourselves, we saw a market for precision turned screws over the more commonly available “pressed threads”. Over the years, the list of sizes and variations available has grown and we now boast over 1000 different sizes.

Individual customers are able to purchase our products via our prompt mail order service. Orders can be placed online via our website, via email or over the phone.

We also welcome trade enquiries. For more information please contact us or visit our manufacturing website, www.ekpscrews.com

Along with our vast ranges of fastenings, we are able to offer various materials, tools, steam fittings, lubricants and soldering products. This makes us a one stop shop for the majority of your engineering needs.

All of our own products are made to the highest quality using traditional engineering methods. We do also stock a range of quality products from other UK manufacturers to compliment our offering.

During early 2021 we made the move to a larger premises with a purpose designed factory and trade counter meaning we are now able to accept click and collect orders.

We pride ourselves on our quality service and competitive pricing and hope to be able to help you with your engineering needs for years to come.

Notes

Notes

We are pleased to be able to offer the drawings and castings for 3 Burrell Traction engines in our large and expanding product range. Each of the engines have been designed and built by ourselves.

Below is a brief outline of each model available including our 6" scale haulage wagon

4" and 8" Gold Medal Tractor

Our 4" scale Burrell Tractor is scaled down model of our popular 8" version. The 8" Tractor has been based upon the single cylinder light haulage of which the Burrell works only produced a small quantity of

6" Burrell Agricultural Engine

The Agricultural Engine is based upon the early Burrell with single drive and differential on the rear axle but with the added benefit of front springs

6" Scale Haulage Wagon

Designed by us to compliment our 6" engine and 8" tractor
